Art Unit: 1743

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 4-11, drawn to an apparatus, classified in class 422, subclass 100.
 - II. Claims 12-18, drawn to a method, classified in class 436, subclass 174.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used for different methods, such as culturing bacteria and removing the broth for testing of extra-cellular components while retaining the bacteria in the reaction cell.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
